III. CONTENT OF THE GENERAL MEETING

The Chairperson of the meeting presided over the Presidium to present each item of the General Meeting's agenda for discussion and approval by the General Meeting, including:

- Proposal No. 345/2026/TTr-HĐQT dated November 04, 2026 of the Company's Board of Directors regarding the approval of the Private Placement Plan for Convertible Bonds;
- Proposal No. 346/2026/TTr-HĐQT dated November 04, 2026 of the Company's Board of Directors regarding the approval of the plan of the issuance of shares for debt swap with Bondholders in the convertible bond issuance
- Proposal No. 347/2026/TTr-HĐQT dated November 04, 2026 of the Company's Board of Directors regarding the approval of the plan to ensure that the issuance of shares for bond conversion and the issuance of shares for debt swap comply with foreign ownership limit regulations
- Proposal No. 341/2026/TTr-HĐQT dated November 03, 2026 of the Company's Board of Directors regarding the determination of the remuneration payable to a member of the Board of Directors, Mr. Romeo Fernandez Lledo

The opinions discussed in the agenda included the following matters:

Shareholder Phung The Ngoc raised three questions: a proposal for the Company to review, standardize and update images of the entire TNH hospital system across various platforms; a question regarding the advance payment of VND 100 billion to Senix Company; and a question regarding the basis for selecting a fixed interest rate of 16% per annum for the convertible bond issuance.

The General Director responded to these matters as follows: TNH would like to thank the Shareholder for the suggestions regarding the enhancement of communication and branding solutions for the hospitals within the Group and will assign the Executive Board to implement them. Regarding the advance payment to Senix Company, the Board of Directors has considered and is currently pursuing various appropriate options to recover the invested amount or utilize the assets for appropriate purposes in accordance with applicable regulations. Regarding the bond interest rate of 16% per annum, this rate was determined based on TNH's secured bank loans, which carry an interest rate of approximately 11% per annum, whereas the bonds to be issued are unsecured. Although the bond interest rate is higher than the bank lending rate, this option offers cash flow advantages because both principal and interest will be paid at the end of the two-year term, thereby reducing periodic debt repayment pressure. Existing shareholders have already expressed interest in the issuance. Following approval by the General Meeting of Shareholders, the Company will work with investors, complete the necessary procedures and is expected to receive the proceeds in February, March 2027. The conversion price of the bonds corresponds to the par value of TNH shares and is significantly higher than the current trading price of TNH shares.

Shareholder Hoang Phuc Thinh raised a question regarding the roadmap, quantitative tools and cash flow balancing for digital transformation investments, as well as gross profit margin control, to ensure that new strategic projects do not place short-term pressure on cash flow and debt repayment obligations.

The General Director responded to this matter as follows: The Company conducts periodic cash flow reviews and balancing every two weeks and holds monthly meetings to ensure sufficient funds for business operations. Digital transformation investments are made within the annual approved information technology budget, based on the needs and effectiveness of each project.

Shareholder Nguyen Tien Uy raised several questions regarding the bond issuance plan, requesting clarification on the relatively high interest rate of 16%, and whether TNH had entered into any preliminary agreements or commitments with investment funds regarding the purchase and conversion of the bonds.

The General Director responded to this matter as follows: Although the bond interest rate of 16% per annum is higher than the bank lending rate, the payment of the entire principal and interest at the end of the two-year term enables TNH to reduce periodic debt repayment pressure, proactively balance cash flows and ensure funding for its business operations in the short term.

Shareholder Tran Phuong Dung raised questions regarding how Thai Nguyen International Hospital and TNH Pho Yen Hospital could achieve their expected revenue growth, as well as measures to avoid the risk of the Company being delisted.

The Chairperson and the General Director jointly provided clarification as follows: The Board of Directors and the Executive Board of TNH are fully aware of the risks associated with the Company's operations and will implement appropriate measures to address them. Currently, Thai Nguyen International Hospital and TNH Pho Yen Hospital continue to record growth in revenue and the number of patients receiving medical examination and treatment services. To ensure that revenue and profit meet expectations, the Company will focus on

introducing additional services and investing in more high-tech centers to improve the quality and operational efficiency of these hospitals.

Shareholder Nguyen Huu Hung raised a question regarding the procurement of goods, supplies and chemicals from an individual household business.

The General Director responded to this matter as follows: In Q3 2026, TNH entered into transactions with Pham Thi Hien Household Business. This business is a supplier of goods and services to three hospitals: Thai Nguyen International Hospital, TNH Pho Yen Hospital and TNH Viet Yen Hospital.

Shareholder Dang Thi Thanh Phuong raised a question requesting clarification on TNH's current outstanding debts.

The General Director responded to this matter as follows: TNH currently has short-term outstanding loans with BIDV and MBBank to supplement working capital for the Company's regular business operations. Short-term debt does not account for a high proportion of the Company's total borrowings. Short-term debt repayments are funded by daily revenue from medical examination and treatment services and quarterly settlements from Vietnam Social Security (VSS) for the hospitals. The majority of TNH's debt consists of medium- and long-term loans, including loans for investment in TNH Lang Son Hospital and TNH Viet Yen Hospital. The debt-to-total-investment ratio of these two projects is not high, at approximately 60–65% of their respective total investment capital.

Shareholder Nguyen Tien Uy raised a question regarding improvements in operational management efficiency and whether TNH plans to implement a KPI-based performance evaluation mechanism linked to the salaries and bonuses of the CEO and the management of each hospital.

The General Director responded to this matter as follows: Since 2026, TNH has implemented appropriate salary and bonus policies for the Executive Board and the hospital management teams. The implementation of these policies is linked to the KPIs assigned by the General Meeting of Shareholders to the Company and its hospitals for 2026, as well as specific targets assigned by the Board of Directors and the Executive Board to relevant individuals and units. The Board of Directors and the Executive Board of TNH fully understand that the salary and bonus policies for members of the Company's Executive Board and the Management Boards of the hospitals must be closely linked to the KPIs of the respective hospitals. In addition, these policies must also be linked to other targets, such as improving professional service quality and patient safety, to ensure the long-term operational efficiency of the hospitals.

Shareholder Luu Viet Hoang raised a question regarding the Group's business performance in the first nine months of the year and its profit forecast for 2027.

The General Director responded to this matter as follows: During the first nine months of the year, the Group's consolidated EBITDA remained broadly flat due to the impact of TNH Lang Son Hospital commencing operations. Excluding the impact of TNH Lang Son Hospital, the Group's EBITDA increased by 30% during the first nine months of the year and has continued to improve.

Regarding the expected break-even point of TNH Viet Yen Hospital: After a period of operation, the hospital has established its reputation, and the adverse factors affecting its

operations have essentially been resolved since Q2 2026. The hospital's operating performance has continued to improve, with relatively strong month-on-month growth. TNH Viet Yen's EBITDA turned positive in Q3 2026.

Regarding the expected break-even point of TNH Lang Son Hospital: The hospital has only been in operation for three months; therefore, the Executive Board is not yet in a position to provide a specific assessment of its break-even point. However, TNH Lang Son Hospital is a major investment project with a favorable location and numerous advantages, and has achieved positive results. Its revenue during the first three months of operation was more than three times the revenue recorded by TNH Viet Yen Hospital during its first three months of operation. The hospital is also planning to increase its bed capacity and introduce additional specialized technical services to improve operational efficiency.

Achieving a profit in 2027 is a highly challenging target. TNH is currently preparing its 2027 business plan. Based on the operating results in recent months, the Executive Board is confident that the Company's business performance in 2027 will be significantly better than in 2026. The Group's depreciation and interest expenses in 2027 are forecast to continue increasing compared to 2026. However, in pursuit of the 2027 profitability target, the Executive Board has been implementing an increasing number of measures to reduce or control operating expenses. The EBITDA and cash flows of the hospitals are forecast to improve significantly from November 2026.

Shareholder Dao Nguyen Viet raised a question regarding the criteria for selecting investors to participate in the bond issuance.

The General Director responded to this matter as follows: The investors expected to participate in the bond issuance are those with strong financial capacity, a commitment to a long-term partnership with TNH, and an intention to convert the bonds into TNH shares upon maturity. The convertible bond issuance plan sets the conversion price at VND 10,000 per share, approximately 50% higher than the current share price. Nevertheless, several investors have already expressed interest and committed to a long-term partnership with TNH.

Shareholder Dang Thi Thanh Phuong raised a question regarding the procedures for sponsoring medical equipment for TNH, as well as how the Company would address the situation in which the Vietnamese economy is facing difficulties while TNH intends to increase medical examination and treatment service fees.

The Chairperson responded to this matter as follows: Since commencing operations, TNH has consistently paid attention to patients' ability to pay for medical services. Current policies demonstrate that the State is increasingly concerned about the rights and interests of the public in general and those of people holding health insurance cards in particular. The implementation of new and high-tech services by TNH will provide patients with more choices regarding where to access medical services without having to travel long distances, which is also a factor in reducing patients' expenses. The Chairperson also provided specific explanations regarding the procedures for sponsoring medical equipment for TNH in accordance with applicable laws and regulations.

Shareholder Nguyen Trung Thanh proposed adding dentistry as a business line and wished to share several suggestions to help the Group increase its revenue and profit.

The Chairperson responded to this matter as follows: TNH has been providing dental services at hospitals within its system. The Company has also cooperated with Nhu Ngoc Dental System and is expected to implement a comprehensive range of high-tech dental services across its hospital system in the near future. In addition, the Presidium sincerely appreciates the suggestions and announced that time would be arranged to welcome Shareholder Thanh, as well as other shareholders, to listen to their contributions and opinions regarding TNH's operations.

Shareholder Vu Van Dung raised a question regarding whether the Company plans to invest in and expand its network by opening additional hospitals over the next two to three years, should its financial position improve.

The Chairperson responded to this matter as follows: TNH is not expected to open any new hospitals in 2026–2027. From 2028 onwards, the Management Board will continue to study and consider implementation, depending on actual circumstances. TNH is also studying cooperation arrangements with reputable branded specialized healthcare systems to jointly operate and develop existing hospitals or establish new hospitals.

Shareholder Dao Nguyen Viet requested further clarification on the specific roles and responsibilities of Board member Romeo to provide a basis for assessing whether the adjusted remuneration was reasonable.

The Chairperson responded to this matter as follows: Mr. Romeo has experience in managing a chain of 44 hospitals in Indonesia, all of which have developed successfully and recognize his role in the development of the system. Mr. Romeo has contributed numerous well-founded and scientifically based recommendations that are suitable for application in private hospitals worldwide. Some of these recommendations have already been implemented within TNH's hospital system, contributing to improved operational efficiency. The Board of Directors of TNH highly appreciates Mr. Romeo's contributions to the development of the TNH system and has entrusted him with the role of Chairperson of two committees under the Board of Directors.

After the discussion concluded, the Chairperson requested the General Meeting to proceed with voting on the above matters.
